LARGE PART PRECISION MACHINING

Since 1976, Technox Machine & Manufacturing has grown into one of the largest complete machine shop operations specializing in large part precision machining in the Chicago area, serving a wide variety of industries.

Because of our versatility, we can be a one-stop source for all your precision machining, fabricating, forming, cutting, grinding, and welding needs. The combination of our unique machinery and years of machining expertise enables us to manufacture large, complex assemblies and subassemblies in quantities ranging from prototypes to small and large productions runs. Our CNC machinery can accurately mill, bore, and turn parts to precise specifications.

As an ISO 9001:2015 facility, we provide in-house control of complete machine shop operations, which allows us to optimize our manufacturing processes, maximize quality, reduce cost, and provide quick delivery. Technox is also OSHA compliant, and AWS certified for high-quality welding.

Machining & Metal Fabrication Services

- Horizontal Boring
- CNC Turning (Horizontal & Vertical)
- CNC Milling (Planer & Horizontal & Vertical)
- Large Part CNC Machining
- Heavy Component Machining
- Welding
- Small Assembly
- Secondary Services

Materials Expertise

- Aluminum
- Brass
- Bronze
- Cast Iron
- Copper
- Hastelloy
- Inconel
- Nickel
- Stainless Steel

Industries Served

- Aerospace
- Automation
- Construction Equipment
- Fluid Power
- Food Processing
- Oil & Pipeline
- Packaging
- Paper
- Plastics Processing
- Printing
- Recycling
- Steel Processing
